R. G. JAMESON,
Auditor.

The foregoing report shows the financial transactions of the library committee for the past year. There have been added to the library since the last report 268 volumes which have been purchased, beside some dozen or fifteen volumes of reports that have come from the state. There are now 1646 books covered, numbered and catalogued, while there is also a large number of books presented to the town by George H. Colby and J. P. Cook which have never been covered or numbered, as they are not calculated for general circulation. The collection of books in the library is getting to be large and valuable, and before long some more commodious place should be found for its accommodation. There are between four and five hundred different persons who take books and they are generally well taken care of, but there are some cases in which parents should see that the children are made to use more care in the use of them.
